SV8100 9.5 Software - Now Available

Enhancing support for Standard SIP Terminals including uMobility Wi-Fi

NEC Corporation of America (NEC) is pleased to announce the latest update of the UNIVERGE® SV8100 communications platform. With SV8100 Version 9500 (9.5) or higher software, the SV8100 supports the NAT (Network Address Translation) mode for Standard SIP terminals.

This will also allow the **uMobility client** to connect via NAT. Small and medium size businesses no longer need to install and configure special VPN (Virtual Private Network) software. Connect to the company's network when you are in the office or get access anywhere your mobile device has Internet services. Voice communications will be improved with NAT support for uMobility.

Business Benefits & Features

Desk phone features to users' mobile devices is enhanced with NAT support for uMobility. Some of the features already supported include:

- Single number reach to reach both office and /or smart phone positively impacting customer service dramatically.
- Smartphone users are able to do station-to-station and external dialing.
- Simply link or twin extension with mobile device.
- Fewer calls are missed improving responsiveness and reducing caller wait time.
- Make and receive phone calls as if it were their desk phone.
- Utilizes in-building Wi-Fi network while in the office.
- Businesses Managers can track cell phone usage in the office since all cell phone calls are captured by the business's phone system call log.
- Businesses can streamline communications and information delivery by handling calls more promptly from any location without having callers directed to voicemail.

Connect anywhere
there is an internet
services

Mobile phones are a mainstay in today's businesses and usage only continues to grow. By enabling employees to be reached anytime, anywhere – any business can become more efficient, responsive, collaborative and productive.

How to Order uMobility

Customers must download the **FREE NEC uMobility application** from a supporting smart phone application store:

- uMobility is available for iPhone, Android, Windows Smart Phones as well as Blackberry.

** The uMobility download is free but requires a third-party or standard SIP license on the SV8100 (p/n 670721).
To get started every new SV8100 CP00 comes with **4 FREE standard SIP licenses**.*

FREE SV8100 9.5 software can be downloaded from www.necntac.com.

How to Quote uMobility in MasterQuote

uMobility with UNIVERGE SV8100 Masterquote is available immediately.

Note: Connections can vary depending on the network. Therefore in some cases a VPN may be necessary.

Authorized NEC Associates and Resellers should contact your NEC Account Manager or NEC Sales Engineer for additional details.

Sincerely,
